Fig. 4c

Differential MI risks based on ARB-specific combinatorial with NSAIDs (excluding glucocorticoids)

Adverse Events Relative Risks

Acute Myocardial Infarction

- nsaids (n = 28,403)
- nsaids + losartan (n = 560)
- nsaids + olmesartan (n = 224)
- nsaids + eprosartan (n = 3)
- nsaids + candesartan (n = 226)
- nsaids + telmisartan (n = 127)
- nsaids + irbesartan (n = 241)
- nsaids + valsartan (n = 573)

Myocardial Infarction
